

PORTABLE BAPTISMAL TANKS

BobHoover portable baptism tank liners are made from heat sealed, industrial strength, potable PVC material and come with a vinyl repair kit. The frame is made from black ABS plumbing pipe and are easily assembled and dismantled.

The complete tank when disassembled fits into a 14" (36cm) x 36" (92cm) carrying bag and weighs under 30 lbs.

To fill the tank, simply attach a garden hose to a nearby faucet (adapter included), adjust for temperature and fill to approximately 22 inches in depth.

To empty, use the same garden hose, but attach to a small submersible utility pump and then drain into the nearest drain available, or if outside onto the ground. If a pump is unavailable a 5 gallon pail will work fine. Pumps are available at Can. Tire or on Amazon for about \$90.

Rose City Baptist Church is the exclusive provider for this product. For more information or for a quote you may contact our office by phone or email.
